DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-43, drawn to a device for increasing the relative number of undifferentiated cells in a cell population classified in class 435, subclass 284.1.
 - II. Claims 44-97, drawn to a method for preparing an undifferentiated cell comprising retro differentiating a more committed cell to a less committed cell, classified in class 435, subclass 377.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Invention I can be used in a method of preparing a transformed cell line.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Claims 1-97 are generic to a plurality of disclosed patentably distinct species comprising

- A. (i) Hematopoietic cells,
(ii) neuronal cells,
(iii) epithelial cells,
(iv) mesenchymal cells,
(v) endodermal cells,
(vi) embryonic cells;
- B. (i) CD34⁺ cell surface marker,
(ii) HLA-DR⁺ cell surface marker,
(iii) CD38⁺ cell surface marker,
(iv) CD117 cell surface marker,
(v) AC113 cell surface marker,
(vi) CD90 cell surface marker,
(vii) CD45^{low} cell surface marker;
- C. (i) CFC-T cells and T-cells,
(ii) CFC-B cells and B-cells,
(iii) CFC-Eosin cells,
(iv) CFC-Bas cells,
(v) CFC-GM cells,
(vi) CFC-MEG cells,
(vii) CFC-E cells.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from Group A, and a single disclosed species from Group B even though this requirement is traversed. In the

event that applicant elects hematopoietic cells from Group A, an additional election from Group C is required.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service.
